# BLOCK AXESS

Made from durable galvanized steel, Block Axess delivers dependable protection without the bulk of concrete or limits of water-filled systems. Block Axess is lighter and more portable than competitor mobile barriers and resists vehicles up to 7.5 tons traveling at 30 MPH. Designed to stop hostile vehicle intrusion and safeguard pedestrian zones, this durable, compact, and ready to deploy barrier provides an invaluable feeling of security and peace of mind.

## SINGLE-PERSON SETUP

- Single-person assembly and disassembly in under 15 minutes.

## EASY TRANSPORT & STORAGE

- Units fits securely into a compact storage kit.
- Kits are easy and convenient to store, transport, and deploy.
- Kits weigh 1,408 lbs total.

## HEAVY-DUTY CONSTRUCTION

- Built from heavy-duty galvanized steel for dependable protection.
- Tamper-resistant design requires specialized tools, ensuring system security.

## VERSATILE & CUSTOMIZABLE

- Modular design allows for custom length barriers by adding or removing components.
- Optional ADA-compliant ramp expands accessibility for all users. Ramp folds in half for quick setup and compact storage when not in use.

## TESTED & CERTIFIED

- Block Axess is certified to resist vehicles up to 7.5 tons traveling at 30 mph.

**J-TECH IS THE EXCLUSIVE AUTHORIZED DISTRIBUTOR OF BLOCK AXESS FOR THE NORTHEASTERN UNITED STATES.**
